Our dedicated teams having the multilevel experience to design and implement a robust and innovative technical solution to support your business operations.

Are you not getting enough customers to your websites? Customers are the driving force of any business. If you are not accessible to your customers, then they would not know about your existence and you would stay in a corner, unnoticed, giving your competitors an overwhelming advantage. Kinetic Enterprise offers quality Search Engine Optimization / SEO Services and Internet Marketing Solutions and makes the website to get Top positions in search engines.

Social Media Marketing & SEO

Our SEO is highly targeted and down to minor details. Using keyword analysis, we can find just how big a market is, how many people are searching for that exact keyword, how competitive the arena is (in SERPs). Based on the keyword analysis we Optimize Title Tags and meta description, also the website content. Our SEO experts work delicately to increase your website presence in the search engine, by Conducting research on website structure, Link prospecting, Penalty/Panda removal services, duplicate content research and more...SEO tactics.

Biometric Attendance System

We present the Biometric Attendance System with security that fulfills the demand of Time. With the biometric device having a Systematic method of data collection, all your staff is just needs to scan their fingerprint and Your attendance record for the day will be taken care of. The eye-catching design with Camera enhances the hi-tech look of the machine and compliments the overall look of any office environment.

Fingerprint-based biometric is the most widely used technology in the market at present. Being the oldest biometric technology to market it is the most trusted technology for ID Management base solutions.

Cameras

Security is a basic need for any home or business now a days to maintain a safe and secure environment. Security and surveillance solutions in Pakistan are in great demand, and our equipment ensures accurate surveillance that you can conveniently monitor at any time and from anywhere.

Keeping in view the Demand and awareness of security in Pakistan, IP cameras and other security equipment are one of the best solutions for continuous surveillance. At Kinetic Enterprise, we strive to provide total protection for you and your family so that you always have peace of mind. Our products are reliable, accurate and effective that has the capability to keep a check on your surroundings.

Having more than 5 years of experience, we have a specialized team of engineers and architects that help you with all the fitting and implementation of the security and surveillance system. Our after sale support is always available to help you in case of any query. So if you want to stay protected and want to buy a complete security and surveillance system package, we are here to help you solve all your problems.

DVRs / NVRs

The NVR (Network Video Recorder) records video and audio data over TCP/IP networks. With up to 32 channels of pure IP surveillance. From monitoring features to video analytics as well as integration with LPR, POS/ATM, and Access Control systems, it stands as one of the most comprehensive IP surveillance software in the security market.

Built upon comprehensive and easy-to-integrate hardware and supporting technologies, the Surveillance and Video Management Platform is the core system platform that provides performance-optimized video monitoring and various advanced video analytics/control features to support many of enterprise's management functions. It is a scalable, extensible platform that can be customized and seamlessly integrated with other security system applications, such as:

1. POS/ ATM/ EAS for loss prevention.
2. Access Control for building automation.
3. License Plate Recognition system for law enforcement, entrance control, and revenue collection.
4. Megapixel IP devices for critical area and mobile object monitoring.
5. Central Monitoring stations for high profile security areas in commercial, industrial and residential markets.

In addition, the remote management WebCam and versatile storage system framework offer high scalability and extensibility for future integration with other functions or systems at remote sites.

SOLAR HOME SYSTEM

We consume approximately two third of our self-generated solar power and therefore it can help us to be more independent from increasing electricity prices and taxes. Solar based home solution will make you self-sufficient and free long power cut off.

Kinetic Enterprise provides solar energy production, management and storage solution. The Smart Energy System is fully integrated and complete with all the necessary components including solar panels, solar and battery hybrid inverter, high energy lithium-ion battery packs and SmartFlow, intelligent energy and storage management software.
